PROFILE

CSE graduate from **RUET**, now building complete backend and frontend systems in production as a developer at ATI Limited — having started my journey on the frontend side and grown into **full-stack** development. I bring a security-conscious, detail-oriented approach to writing optimized, scalable, and maintainable code. I'm also exploring **AI-assisted** development workflows, with particular attention to verifying AI-generated code for accuracy, performance, and adherence to industry best practices. Alongside my work, I'm pursuing a **part-time MSc Engg** in **CSE** at **BUET**, with a planned NLP research focus for my master's thesis.

TECHNICAL SKILLS

Languages	:	JavaScript, TypeScript, SQL.
Frameworks	:	Next JS, Nest JS, Tailwind CSS.
Libraries	:	React JS, Shadcn.
Database	:	PostgreSQL, Prisma ORM.
Dev Tools	:	Visual Studio Code, Postman, Swagger.
Version Control	:	Git, GitHub.

EXPERIENCE

Front End Web Developer — 4 May, 2024 – Present
ATI Limited — *Onsite - Dhaka, Bangladesh*

- **Developed** dynamic, responsive websites using Next.js, focusing on clean UI and smooth user experience.
- **Integrated** REST APIs to power data retrieval and display across multiple production projects.
- **Implemented** backend logic and API endpoints using Nest.js, PostgreSQL, and Prisma to support full-stack features.
- **Projects:**
  - Contributed frontend development for **Her Power (live site)**, an ICT Ministry initiative, and **KYAMCH-BRS (live site)**, a bioresearch center platform (a sister concern of **Drug International**).
  - Worked on the web platform of a USA-based **POS system** — a broader product that also includes mobile and desktop apps developed by other teams.
  - Currently working full-stack on two **e-commerce** platforms — **Natura Care Limited (live site)** and **Thai Health Product** — handling both **frontend** interfaces and **backend** logic.
- **Collaborate cross-functionally** with business, UI/UX, backend, mobile app, and systems teams to deliver features through the full **SDLC**.
- **Core Technologies:** Next.js, Tailwind CSS, Shadcn UI, Tanstack Query/Table, React Hook Form, Yup, Zod, Nest.js, PostgreSQL, Prisma, REST APIs, Postman, Hoppscotch.

EDUCATION

MSc Engg in Computer Science & Engineering — April-24
Bangladesh University of Engineering & Technology (BUET) — *CGPA: 3.00/4.00*

- Part-time student.
- 21 credits completed out of 36 credits.
- Completed 1 academic group project based on machine learning and 2 personal projects.
- **Taken Courses:** Data Mining, Software Quality Assurance, Neural Networks, Programming Language and Systems.

Bachelor of Computer Science & Engineering — 2018-2023
Rajshahi University of Engineering & Technology (RUET) — *CGPA: 2.90/4.00*

- Accomplished thesis on Hyperspectral Image based on **Deep Learning**.
- Performed detailed analysis of the **ICT department of NESCO (Northern Electricity Supply Company Limited)** as a part of group collaboration of **Information System Analysis and Design**.

* Completed 3 academic projects.
* **Key Courses: Data Structures**, **Computer Algorithms**, **Database Design and Concept**, **Software Engineering**, Statistics and Queueing Theory, Data Mining, Artificial Intelligence, Neural Network, **Operating System**, Parallel and Distributed Processing, **Computer Network**, **Network Security**, Computer Architecture, Compiler Design, etc.

Higher Secondary School Certificate (HSC) 2016-2017
Rajshahi College, Rajshahi *GPA: 5.00/5.00*

Secondary School Certificate (SSC) 2014-2015
Govt PN Girls School, Rajshahi *CGPA: 5.00/5.00*

PROJECTS

Natura Care Limited (live site) – Full-Stack E-Commerce Platform

- Designed and built a complete e-commerce application end-to-end, covering product catalog, cart, and checkout flow.
- Developed core backend modules — category, product, promotions, career, and media & news — with secure email OTP-based authentication.
- Integrated Google Analytics and Meta Pixel via Google Tag Manager for user behavior and marketing performance tracking.
- **Technologies:** Next.js, Nest.js, PostgreSQL, Prisma, Tailwind CSS.

KYAMCH-BRS (live site) – Bioresearch Center Platform (Drug International)

- Developed a multi-page corporate website covering About, Solutions, Expertise, Participate, and Consulting sections.
- Built a therapeutic-areas showcase and a volunteer/patient registration flow for clinical study participation.
- Implemented a dynamic News & Insights section with responsive, image-optimized layouts using Next.js.

CERTIFICATION

- **Complete Web Development Course**
  During the pandemic, I enrolled in **Programming Hero's** Complete Web Development Course, an online platform providing tailored guidance. I gained proficiency in **HTML, CSS,** and **JavaScript**, completing vanilla projects. I also delved into advanced front-end development with **React.js** and explored CSS libraries like **Bootstrap, Tailwind CSS, React Bootstrap,** and **Material UI**. Additionally, I acquired foundational backend skills in **Node.js** and **Express.js**, mastering **MongoDB**. I learned to deploy applications on platforms like **Netlify**, Firebase for front-end, and **Heroku** for back-end, successfully completing multiple **MERN stack** projects. Click here.
- **Workshop on Networking Basics, Routing and Switching**
  Amidst the pandemic, I attended an in-person Networking workshop, mastering basic Routing and **IP address** distribution, and subsequently applied this knowledge by simulating routing scenarios using **Cisco Packet Tracer**. Clcik here.
